If we can't get enough calcium ?

Calcium is eluted and overflowed in our body. This will be the cause of aging or become a ringleader of high blood pressure, arteriosclerosis, myocardial infarction, and diabetes.

Too much intake of calcium is danger ?

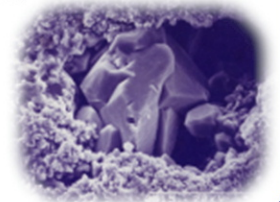

Calcium intake from a mouth is bowel absorption. Even if it is excess intake, extra calcium becomes a excrement. It is important to intake calcium from a mouth.

What is Fossil Coral produced in Yonaguni Island ?

It is Coral reef which grew up in the clean sea became the tableland by the raising of the earth movement 10 thousands years ago. Donan is made from this fossil coral and it is 100% natural product without additive or chemical compound. In addition, there is an effect of adsorption of unwanted material for the porous fossil coral.

Bits of knowledge !

Sea water and amnion liquid are almost same component.
